GN Docket No. 13-86

FCC Mail Room 23, 2013

Commissioner's Secretary  
Federal Communications Commission -

I oppose any changes to the current FCC indecency standards that would allow television & radio stations to broadcast expletives & nudity on the public airwaves, even if brief or fleeting.

Even though the Supreme Court has confirmed the FCC's authority to enforce policies regarding expletives & nudity, especially during times when children are likely to be watching or listening, the FCC has continually pushed their obscene programming to the limit.

There are televisions & radios everywhere & I cannot imagine taking my family out to dinner where people are in most places exposed to watching whatever is programmed on the business television.

It is already a fact that you cannot watch a television program without seeing nudity, sexual situations & all sorts of violence & perversion. Then you wonder why our nation is in the shape it's in.

I realize you are considering this for the money but what good is it to gain the whole world & lose your soul. If this situation comes to pass I will no longer need a television or a radio. My eyes & my ears were not made as trash receptacles. And I can spend my money somewhere else.

Subject: Proceeding No. 13-86  
Relaxing of Obscenity Standards in Prime Time TV & Radio

To Whom It May Concern,

I am writing you this letter to urge you not to loosen restrictions for obscenity on broadcast television and radio, nor allow "brief non-sexual nudity and isolated expletives and vulgarity" during prime time, while minor children are still awake and watching TV or listening to the radio.

Examples of immorality shown to our children desensitize them to actions and behaviors that contribute to the breakdown of the family, which is a real and quantified cause of broken families, and violence and crime in our society. Children that are brought up in a family with a mother and a father that teach them morality and responsible citizenship are more likely to succeed in life and avoid crime and prison.

It seems that the FCC is using the excuse for considering this change of financial savings by fewer complaints responded to. The FCC wants to abdicate its responsibility to protect our youth to save a few dollars? We may as well do away with the FCC if it can't do its duty, for what good would it be?

Those promoting the relaxation of these standards often use "Free Speech" as their legal basis, but their free speech has its own forum, its own time and place, and should not be shoved in the faces of those who are offended by it and by those too young and innocent to discern right from wrong. My we not have preserved a time that we don't have to see and hear obscenities, or must we be exposed to it so often that we have no other choices but to give in to the destruction of our society or disconnect altogether in order to preserve our conscience?

Again, I urge you, please do not do this thing which will surely harm our children and our people.  
Thank you.

Sincerely,

David Shumway
